

12th KJC PHF: Date: 25th, March 2016, Location :Tamra Hall, 8th Floor, Ramada Plaza Jeju Hotel			
Registration	8:00~	Registraion	
Opening	8:30~8:40	Korean President	
	08:30~8:40	Opening Ceremony	
SESSION 1	08:40~09:45	Chair	Yong-Jin Kim, Shoubao Ning, Kisaburo Sakamoto
	Lecture	In-Sam Park	Resolution of protein-losing enteropathy in three consecutive patients after Fontan operation by administration of beta-blocker, angiotensin-converting enzyme inhibitor, and angiotensin receptor blocker following steroid therapy
	Free Paper	Taisuke Nabeshima	Theoretical Ideal Pulmonary-Systemic Flow Balance and Optimal Timing of Bidirectinal Cavopulmonary Anastomosis for Patients with Low Cardiac Output.
	Free Paper	Akio Inage	Value of ventricular function in Fontan patients undergoing feature tracking magnetic resonance strain
	Free Paper	Sang-Yun Lee	The hepatic stiffness by shear waves elastography in patients with Fontan circulation and related factors by laboratory test and cardiac catheterization.
		Discussion	
SESSION 2	09:45~10:50	Chair	Jae Gon Ko, Zhongdong Du, Satoshi Yasukochi
	Lecture	Yiu-fai Cheung	Atrial Function: Physiology, Assessment, and Relevance in Congenital Heart Disease
	Lecture	Eun Jung Bae	Sudden cardiac death in pediatric populations; Molecular autopsy
	Lecture	Chunmei Cao	Role of PI3K regulatory subunit p55 in vascular proliferative disorders
		Discussion	
	10:50~11:05	Coffee break	
SESSION 3	11:05~12:15	Chair	Shi Chan Sung, Fen Li, Shozaburo Doi
	Lecture	Shingo Kasahara	Results of correction of complete atrioventricular septal defects and risk factors for late reoperation
	Lecture	Bing Jia	Surgical management of complete atrioventricular septal defects
	Free Paper	Dong Woog Yoon	Ross And Ross-Konno Procedures In Pediatric Patients: A 20-Year Experience
	Free Paper	Yuriko Shima	A 41 years old male complicated with abscess around aortic valve 17 years after Ross operation
		Discussion	

12th KJC PHF: Date: 25th, March 2016, Location :Tamra Hall, 8th Floor, Ramada Plaza Jeju Hotel			
	12:15~13:00	Lunch	
SESSION 4	13:00~14:30	Chair	Young Hwan Park, Toshio Nakanishi, Bing Jia
	Lecture	Changha Lee	Early total repair of symptomatic TOF with or without pulmonary atresia
	Lecture	Xiaofeng Li	Surgical treatment of vascular rings:Beijing Children's Hospital experience
	Lecture	Taejin Yun	Ebstein's anomaly : A wide spectrum of disease from neonatal presenation to benign TR in adults
	Lecture	Masaaki Kawada	Current surgical management of adult patients with corrected transposition of the great arteries
		Discussion	
	14:30~14:45	Coffee break	
SESSION 5	14:45~16:00	Chair	Chung Il Noh, Min Huang, Teiji Akagi
	Lecture	Jae Young Choi	Principles and strategies for transcatheter closure of multiple ASDs
	Lecture	Kenji Suda	Clinical significance of ST segment elevation on electrocardiography during trans-catheter closure of atrial septal defect
	Free Paper	Xiaoyu Wu	Intervention therapy of hemotysis in children
	Free Paper	Jo Won Jung	The Prevalence of Compression of Left Coronary Artery in Patients with Pulmonary Arterial Hypertension
		Discussion	
SESSION 6	16:00~17:00	Chair	Chang Sung Sohn, Hongyan Zhang, Etsuko Tsuda
	Free Paper	Lijian Xie	Quantitative evaluation of myocardial fibrosis by cardiac integrated backscatter analysis in Kawasaki Disease
	Free Paper	Nobuyuki Tsujii	Late wall thickening and calcification in patients after Kawasaki disease noninvasively detected by Dual Source Computed Tomography
	Free Paper	Lan He	Multi-center randomized controlled study on treatment methods with IVIG to Kawasaki disease
	Free Paper	Huiling Lu	Circulation levels of the adipocytokines chemerin and omentin in children with Kawasaki disease
	Free Paper	Gi Beom Kim	Epidemiologic features of kawasaki disease in South Korea, 2012-2014
	17:00~17:10	announce from next 3 counry forum	
	17:10~17:15	Closing remark
