

POSTER PRESENTATION (date : 25th March, 2016, Location:HALLA hall, 8th RamadaPlaza Jeju hotel)

발표번호	Presenter Name	Title
KP1	Young Kuk Cho	Rapid Regression in Preterm Neonate with Left Ventricular Outflow Tract Rhabdomyoma After Sirolimus Therapy
KP2	Young Hyun kim	T helper 1 & 2 cytokine profiles in patients with Kawasaki disease
KP3	Hyeryon Lee	Changes of gene expression in adriamycin induced cardiomyopathy rat model
KP4	Ju Ryoung Moon	The relationship of parental rearing behavior and resilience as well as depressive symptom in adolescents and young adults with congenital heart disease.
KP5	Nam Kyun Kim	Left Stellate Ganglion Block Attenuates Autoimmune Myocarditis by Suppression of the Sympathetic Hyperinnervation
KP6	BO SANG KWON	Load Dependent Mechanical Dyssynchrony and Myocardial Deformation of Left Ventricle in Patients with Tricuspid Atresia after Fontan Procedure
KP7	BO SANG KWON	Clinical characteristics of Catecholaminergic Polymorphic Ventricular Tachycardia in Children
KP8	Eung Re Kim	Radiofrequency Catheter Ablation of Intractable Ventricular Tachycardia in an Adolescent Following Total correction of Ebstein's Anomaly
KP9	Eung Re Kim	Reductionplasty for Ascending Aorta Dilatation Associated with Bicuspid Aortic Valve in Pediatric Patients
KP10	Hyoung Doo Lee	Periventricular closure of apical muscular ventricular septal defect in an infant, a case report
KP11	Soo Jung Kang	Left Atrial Deformation Mechanics in Patients with Kawasaki Disease
KP12	Ji-Whan Han	Usefulness of anterior uveitis as an additional tool for diagnosing incomplete Kawasaki disease
KP13	Kee Soo Ha	New useful diagnostic markers of Kawasaki disease using Titin, and Muclin in serum
KP14	Lucy Eun	The Influential Exertion on RV after Conduit Repair of Tetralogy of Fallot – A Comparison of the RV after RVOT Patch vs Conduit Repair of Tetralogy of Fallot
KP15	Hae-Yong Lee	ECG abnormalities in Kawasaki disease
CP1	Yaping Liu	N-terminal pro-brain natriuretic Peptide, a predictor of coronary arterial lesions in Kawasaki disease
CP2	Huiling Lu	Inflammatory markers and adipokines alter adipocyte-derived ASP production
CP3	Meng Xu	Clinical diagnosis and treatment of 107 cases of Pediatric tachyarrhythmias
CP4	Jianyi Wang	Risk factor in children with recurrent vasovagal syncope

CP5	Renjian Wang	Evaluation of myocardial deformation in children with Kawasaki disease by two dimensional speckle tracking echocardiography
CP6	Huifeng Zhang	Hybrid technique for treatment of short segment coarctation associated with ventricular septal defect – a single-center retrospective review of 92 cases
CP7	Gang Chen	Mid-term Outcomes of Transventricular Valvotomy Approach for Initial Treatment of Pulmonary Atresia with Intact Ventricular Septum
CP8	Hong Tian	Changes and significance in the levels of 24-hour urinary sodium and plasma Angiotensin II in children with vasovagal syncope and postural tachycardia syndrome
CP9	Feng Wang	Clinical course of tachycardia-induced cardiomyopathy in children: a series of 56 pediatric cases
CP10	Diqi Zhu	VEGFA signaling regulates arterial-venous specification in zebrafish
CP11	Xinyi Xu	Treatment of infective endocarditis in children with linezolid
CP12	Lijun Fu	Identification of LAMP2 mutations in early-onset Danon disease with hypertrophic cardiomyopathy by targeted next-generation sequencing
CP13	Yuxiao Ji	Study of single nucleotide polymorphism of FCGR2A Gene in Chinese Han Children with Kawasaki Disease
CP14	Zixu Huang	T-VDCC CaV3.1 and CaV3.2 involves in pulmonary hypertension
CP15	Jinling Xu	Occlusion of a cast Patent Ductus Arteriosus with Amplatzer Vascular Plug
CP16	Yanan Geng	The Association between the Single nucleotide Polymorphism of Fibroblast Growth Factor 23 (FGF23) Gene and Kawasaki Disease and Coronary Artery Lesions
JP1	Midori Fukuyama	A 32-year-old female with a subclavian giant pseudoaneurysm relating on BT shunt in childhood.
JP2	Masaaki Kawada	Angina developed 6 years after neonatal arterial switch for false Taussig-Bing anomaly associated with bicuspid pulmonary valve: Nightmare experience of revision surgery for complicated multiple obstructive sequelae
JP3	Daisuke Matsubara	Vascular ring diagnosed on prenatal screening echocardiography by a primary obstetrician: a report of two cases—possible usefulness of a guideline for fetal echocardiography
